CITY OF ST. HELENA

PLANT OPERATOR I/II/III
WATER TREATMENT

Class specifications are only intended to present a descriptive summary of the range of duties and responsibilities associated with specified positions. Therefore, specifications may not include all duties performed by individuals within a classification. In addition, specifications are intended to outline the minimum qualifications necessary for entry into the class and do not necessarily convey the qualifications of incumbents within the position.

DEFINITION:

Under direct and general supervision, learns to perform and performs the full array of duties assigned to classes in the Plant Operator-Water Treatment series, including operations, controls and maintenance work in a Public Works water treatment plant and related facilities; demonstrates a full understanding of all applicable policies, procedures and work methods associated with assigned duties; performs other related duties as required.

DISTINGUISHING CHARACTERISTICS:

Plant Operator I – Water Treatment

The Plant Operator I is the entry level class in which the incumbent learns to perform assigned duties and serves in the capacity of a Plant Operator I. Initially, under direct supervision, incumbents perform the more routine plant operator duties while learning City policies and procedures. As experience is gained, there is greater independence of action within established guidelines. This classification is alternatively staffed with Plant Operator II, and incumbents may advance to the higher level after gaining experience and demonstrating a level of proficiency that meets the qualifications of the higher level class.

Plant Operator II – Water Treatment

The Plant Operator II is the journey level class responsible for a wide variety of plant operations and maintenance of the water treatment plant and related facilities, and incumbents are expected to perform the full scope of assigned duties. The classification is alternatively staffed with Plant Operator III and incumbents may advance to the higher level after gaining experience, obtaining required certifications and demonstrating a level of proficiency that meets the qualifications of the higher level class.

Plant Operator III – Water Treatment

The Plant Operator III is the advanced journey level class responsible for the full range of treatment plant responsibilities and for the performance of the most complex and difficult assignments within the series. Incumbents in this classification provide training to less experienced staff. This classification is distinguished from the next higher classification of Chief Plant Operator in that the latter is responsible for the overall operation and supervision of the water treatment program.
SUPERVISION RECEIVED/EXERCISED:

**Plant Operator I – Water Treatment**
Receives direct supervision from the Chief Plant Operator – Water Treatment, or higher level staff if assigned. Incumbents in this class do not routinely exercise supervision.

**Plant Operator II – Water Treatment**
Receives general supervision from the Chief Plant Operator – Water Treatment. May occasionally assists in the training of less experienced staff.

**Plant Operator III – Water Treatment**
Receives general supervision from the Chief Plant Operator – Water Treatment. May provide training to less experienced staff.

**ESSENTIAL FUNCTIONS:** *(include but are not limited to the following)*

- Operates, monitors and maintains all plant equipment, components and related facilities, including but not limited to pumps, chemical feed systems, tanks, plumbing, pump stations, wells, and control systems; reads and interprets meters, gauges and charts; conducts well soundings; performs backwash operations; maintains and upgrades mechanical and electrical systems.

- Conducts regular on-site inspections of plant and system operations making appropriate adjustment to process controls ensuring that operational problems are identified and corrected; ensures that plants are operating within safety standards established by federal, state and local laws, ordinances and regulations; may provide training and supervision for less experienced personnel.

- Performs basic and skilled water quality laboratory testing and analysis; takes samples on a daily basis to ensure proper plant operation and quality of water; adheres to quality assurance programs for laboratory analysis and instrumentation; prepares and updates reports, including records and logs in compliance with state and federal mandates for reporting.

- Performs maintenance and construction work as directed on the water treatment system and related facilities; maintains plant facilities and grounds in a safe, clean and orderly condition; loads and unloads equipment and materials.

- Establishes positive working relationships with representatives of community organizations, state/local agencies and associations, City management and staff and the public.

**WORKING CONDITIONS:**

Position requires sitting, standing, walking on level and slippery surfaces, reaching, twisting, turning, kneeling, bending, stooping, squatting, crouching, grasping and making repetitive hand movement in the performance of daily duties. The position also requires both near and far vision when inspecting work and performing maintenance on assigned equipment. The need to lift, carry and push tools, equipment and supplies weighing 25 pounds or more is also required. Additionally, the incumbent in this position may be exposed to biohazards and a variety of working conditions, including wet, hot and cold. The incumbent may use cleaning and lubricating chemicals, which may expose the employee to fumes, dust.
and air contaminants. The nature of the work also requires the incumbent to climb ladders and work in confined spaces. The incumbent may be required to respond to after hours emergency call-outs.

Some of these requirements may be accommodated for otherwise qualified individuals requiring and requesting such accommodations.

QUALIFICATIONS: (The following are minimal qualifications necessary for entry into the classification.)

Education and/or Experience:

Any combination of education and experience that has provided the knowledge, skills and abilities necessary for a Plant Operator I/II/III - Water Treatment. A typical way of obtaining the required qualifications is to possess the equivalent of:

Plant Operator I – Water Treatment
One year of maintenance, construction or related experience equivalent to that of a Maintenance Worker I with the City of St. Helena, and a high school diploma or equivalent.

Plant Operator II – Water Treatment
One year of experience in the operation and maintenance of a water treatment plant equivalent to that of a Plant Operator I with the City of St. Helena, and a high school diploma or equivalent.

Plant Operator III – Water Treatment
Three years of experience in the operation and maintenance of a water treatment plant, one year of which must have been while in possession of a Grade II Water Treatment Plant Operator certificate, and a high school diploma or equivalent.
